

To Whom It May Concern:

I gladly pay my hard earned money for XM Satellite Radio. I hear all this about the NAB crying about the local traffic and weather that XM offers. This is a service I PAY for and it is much better and way more detailed then anything public radio can give me. Tell the NAB to stop crying and give the listeners what they want or soon they won't have any more listeners because they are inferior to satellite radio in every way. Please reject NAB's petition 04-160.

Thank you,

Christopher Thompson
